

FOR IMMEDIATE RELEASE

AIS Fund Administration Hires Anthony J. Perugini Chief Technology Officer

HACKENSACK, NJ – 02 MAY 2011 – AIS Fund Administration (AIS), a leading hedge fund administrator providing full middle and back office support to hedge fund managers today announced it has hired Anthony J. Perugini as Chief Technology Officer, a new position. Mr. Perugini brings more than twenty years of experience in financial services technology development and support, with a concentration in hedge funds, prime brokerage and hedge fund administration.

Paul Chain, President of AIS Fund Administration, said, “Tony has expertise in the latest technologies and development methodologies as well as superior knowledge of their applications to the hedge fund industry. AIS is fortunate to have him join our team, and we expect managers and investors alike to benefit from his vast experience.”

Previously, Mr. Perugini was Vice President of Operations and Accounting Technology, Harvard Management Company, Boston. Prior to his position at Harvard Management Company, he served as Chief Technology Officer at Sandelman Partners.

About AIS Fund Administration

With offices in Hackensack, New Jersey, London, and the Cayman Islands, AIS provides an outsourced solution for the middle and back office to hedge funds, as well as fund administration. The AIS team consists of experts who specialize in the operational and financial matters critical to the smooth day-to-day operations of a fund. AIS’ offering includes daily reconciliation of trades, positions and cash. Managers have access to over 150 daily reports through AISdirect™ including attribution, financial accounting, operational and daily NAV. All reports have been designed with a CFO in mind, are GAAP compliant and audit friendly. AIS also offers clients AISconnect™, its proprietary trade capture system. AIS’ platform is comprehensive and can serve all asset classes and strategies. Further information about AIS can be found at www.aisgrp.com
